

Providing links to your students

The documents on this site are formatted for instructors. There are also documents formatted for students. * If you want to hand out a printed version of the activity, there is a link to a *Word format* near the top of each document.

Feel free to customize this to suit your own class! * If you prefer to give your students a URL so they can access the document via the web, we suggest you give them the *Student link* that can be found in each document. This way, your students won't see the instructor-facing links on this page.
